

## **PCMartBD:**

Your One-Stop Solution for PC Hardware and Repair. At PCMartBD, we provide top-quality PC hardware and professional PC repair services. Browse through our extensive catalog or reach out to our team for assistance.

So basically this is a website where users can sign up and login and browse through different sort of hardware to add to favorites or to buy by adding to cart .

There are 4 types of users :

- 1.Admin- Who controls everything and create , update, delete view dashboard , stat of economy , and do everything other users can
- 2.Employee- Who can check reviews from users on technician service (repair) , check review of technician on the company , add, edit, delete products in the website db,
- 3.Technician- who can manage their appointments by selecting them to provide repairing services to the customers , give review on the users(customer) and on the platform(pcmartbd) as well , check their own dashboard (salary ,paid,withdraws,etc)
- 4.Customer-who can sign up and login and browse through product, add to favorites, add to cart, buy form cart using various payment methods,give reviews on the service(technician) , reviews (platform),contact

In Home Page: (Buttons) [Home][About][Contact][FAQ][Login][Join U][Create Account]

A section of selecting product category where user(customer) can select a category of product (hardware) to go to the category products page

A section to make appointments for repairing

A section showing newly added products, and trending/best products

A section of footer

In join Us – anyone can apply /sign up for either employee or technician

And admin can manage or recruit them

In create account , only customers can sign up

In About- info of company(pcmartbd) and footer

In Contact – contact info and complain box using any mail

In FAQ only frequently asked questions, and answers, and also a ‘ask qstn; box using any mail to ask

In login – everyone use email and pass to get in

After log in, 4 users will have their own view

Admin can see everything and dashboard

Customer can see product, home page , browse, add to fav, add to cart, buy out,

Technician can see live appointment based on their time slot and area (zone).

Employee can add/edit, delete product, see all reviews, contact to admin

This whole project is done by Php,html,vs code ,apache,phpMyAdmin xampp only
